Salt Tolerant New York Natives

Road salt can be tough on plants. The following species are considered salt tolerant. If you are planting near the road or near an area that is salted in the winter, you might want to consider some of the plants from the list below. Salt is also carried in runoff, so even if your plants aren't right next to the road, if they are receiving runoff from the melt or spray from cars or plows, they can also be affected.
